

Serial No. 09/804,081

a concave-convex portion provided on one side of the transparent layer, the concave-convex portion having a specific continuous and regular shape comprising fine concaves and convexes continuously provided at a predetermined pitch of not more than the wavelength of light; and

a layer, provided on the fine concaves and convexes, formed of a resin composition having a lower light refractive index than a refractive index of the transparent layer.

Cancel claim 4 without prejudice or disclaimer.

Amend claim 6 as follows:

6. (Twice Amended) A polarizing element comprising: a polarizing plate; and, stacked on the polarizing plate, an antireflection film comprising:

a transparent layer formed of a cured product of an ionizing radiation-curable resin composition; and

a concave-convex portion provided on one side of the transparent layer,

Serial No. 09/804,081

the concave-convex portion having a specific continuous and regular shape comprising fine concaves and convexes continuously provided at a predetermined pitch of not more than the wavelength of light.
